Week 1: August 22-28
Post on Discussion Board:

Introduce yourself to the class. Tell us about yourself including how long you have been in respiratory care and how long you have attended MSU.

Week 2: August 29-September 4

Consider areas in which you would like to increase your skill areas and develop yourself professionally. Be prepared to post at least three ideas between now and the end of week three. These areas are not limited to the ones on the chart above. Please submit ideas you may have for consideration to instructor. (One previous submission that was approved for the class was a 40 plus hour school with certification on hyperbaric treatments). This past semester several students participated in disaster training and seemed to enjoy that area.

Week 3: September 5-11

Begin commenting on at least three different students ideas within the class. The goal is to confirm and/or redirect your own area of interest and learn from others within the network of this class. Please share any positive and/or negative comments that you have personally experienced with the certifications your peers are considering. Please exclude all hearsay and keep to facts!

Week 4: September 12-18

Take into consideration any feedback you may have received and determine which area or areas you plan to pursue. Post your decision by September 13.

Weeks 5-8: September 19-October 16

Schedule all classes necessary to fulfill your objectives of this class.

Weeks 9-14: October 17-November 28

Complete courses and write reflective report as described in syllabus. Please share on discussion board ways the newly acquired skills have assisted you in your practice if applicable.

Please post comments on this course on the main discussion board. Include ways this course could be improved in the future as well as things you may have liked or disliked about the course. Thank you in advance for your comments!
